

## Add Mail Account

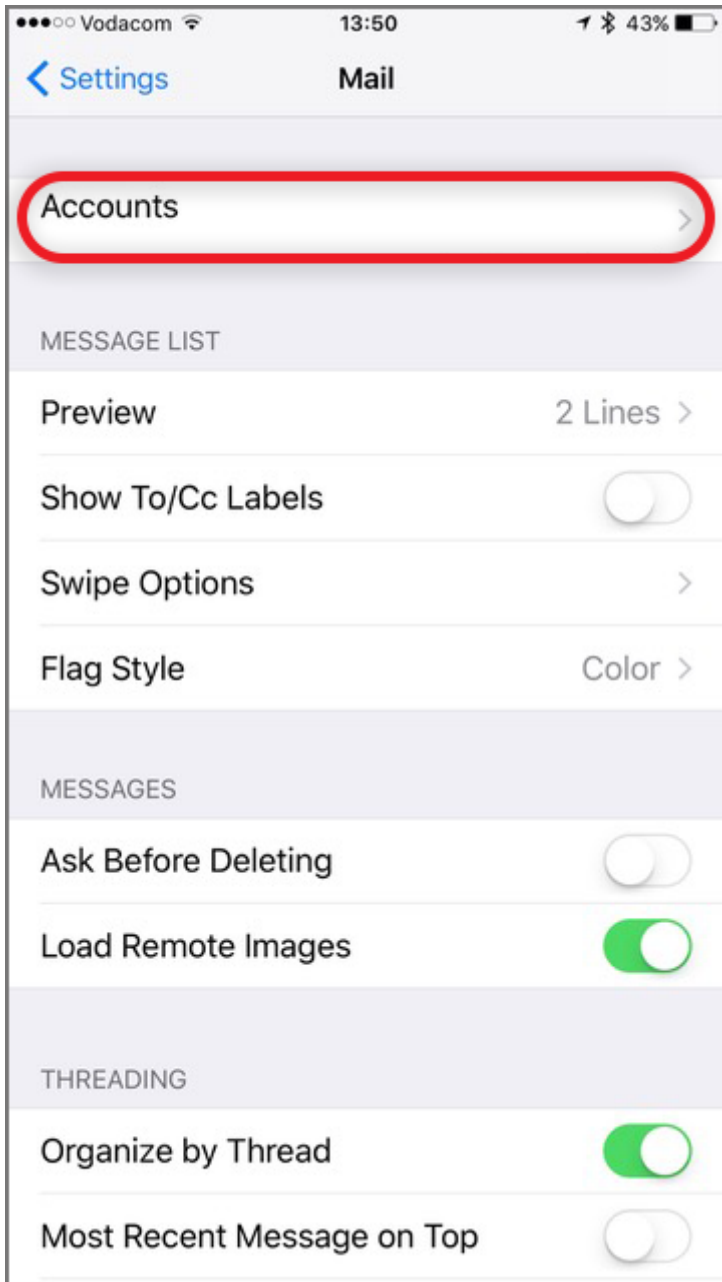

1. **Select the settings icon** on your home screen

2. Select **Mail**

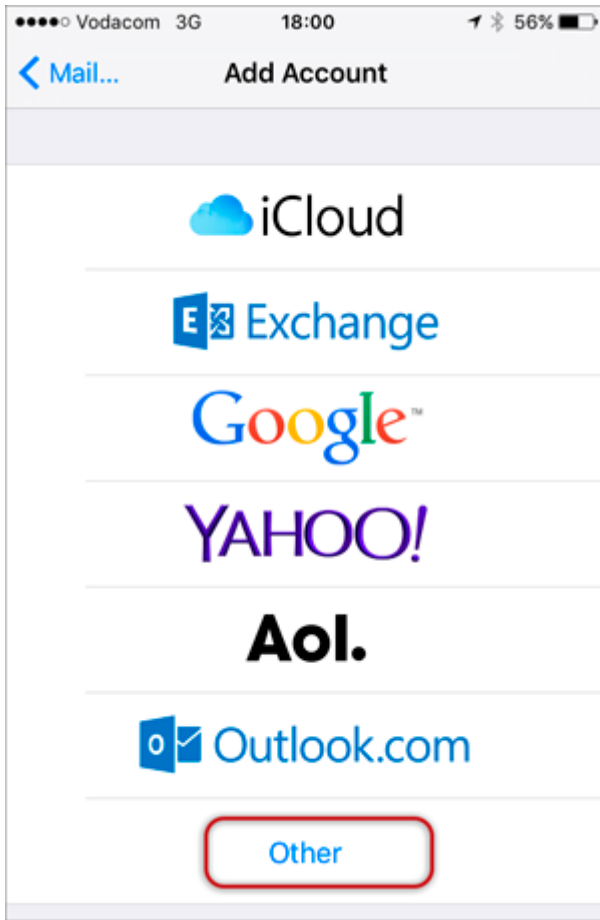

3. Select **Accounts**

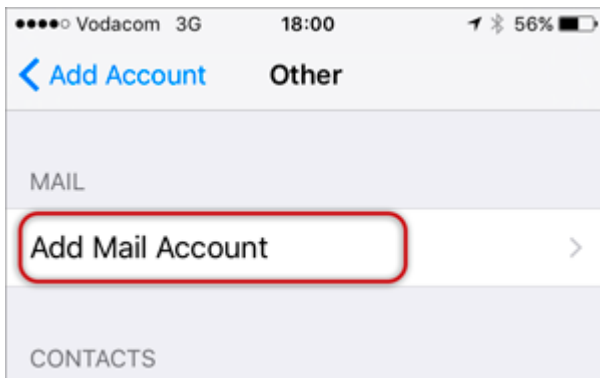

4. Select **Add Account...**

5. Select **Other** from the menu:

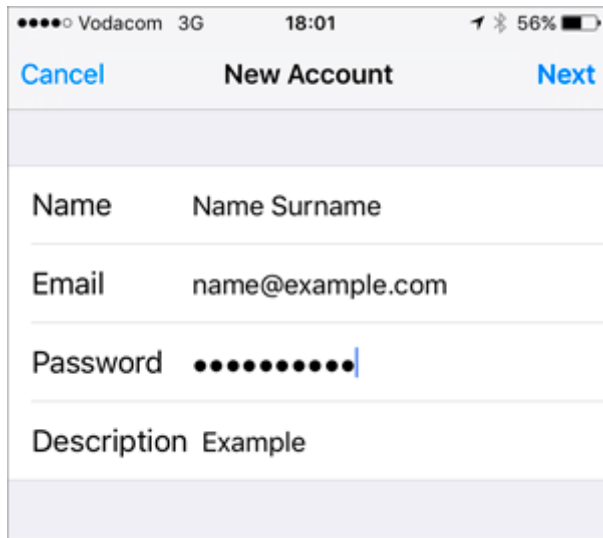

6. Select **Add Mail Account**

## Enter your account information

7. Enter your Name, Email & Password > **Next**

- *Forgotten passwords can be **reset in konsoleH***

The screenshot shows an iPhone interface for creating a new account. At the top, the status bar displays 'Vodacom 3G', the time '18:01', and a battery level of '56%'. Below the status bar, there are three buttons: 'Cancel' on the left, 'New Account' in the center, and 'Next' on the right. The main content area contains four input fields: 'Name' with the placeholder text 'Name Surname', 'Email' with the placeholder 'name@example.com', 'Password' with a masked password of 10 dots and a cursor, and 'Description' with the placeholder 'Example'.

## Configure Incoming and Outgoing Servers

8. Select **IMAP**

9. Scroll down to **Incoming Mail Server** and enter all the relevant details, then do the same for **Outgoing Mail Server**, as in the screen below and then select **Next**.

- Ensure that **User Name** is the full email address
- **User Name & Password** are the same for both **Incoming & Outgoing** servers
